Sarah E. Dunsmore, PhD
National Institute of General Medical Sciences

Sarah E. Dunsmore, Ph.D. is a Program Director in the Pharmacology, Physiology and Biological Chemistry Division at the National Institute of General Medical Sciences. She oversees research grants and career development awards in the areas of molecular pharmacology and sepsis. She also serves as the program director for several clinical trials that are testing novel treatments for sepsis and septic shock. Dr. Dunsmore received a B.S. in molecular biology and mathematics from Vanderbilt University and a Ph.D. in physiology from the Pennsylvania State University College of Medicine. She held positions at University College London and Harvard Medical School/Brigham and Women’s Hospital before joining the National Institute of General Medical Sciences in 2006.
